THE ECONOMY OF THE FARM there is nothing so important as the Plow. It is the basis of all agricultural pursuits, and does more work and of greater value than any other implement. Its importance, however, is scarcely fully understood. Many farmers are inclined to think that anything called a plow serves the purpose, while, as a matter of fact, there is the greatest difference in the world in the principles of construction and the utility of various makes of plows. It is necessary that a plow, to be durable and serviceable, should be built on correct scientific principles, of the very best materials, and by the most skilled workmen. In buying a plow farmers are very apt to overlook these facts, and perhaps never realize the great damage they have sustained by the saving of a few dollars in the purchase of a plow, failing to understand that the falling off in the quantity or quality of their crops may be due to the inferiority of that implement. We earnestly invite our friends and all those who purchase plows to make a thorough and careful examination of the merits and points of superiority of our celebrated J. I. Case Plows. Our factory has the finest and most complete plant in the world for the manufacture of implements of this class. They use none but the very best quality of materials, and their workmen are thoroughly skilled in the various branches. As a whole, our J. I. Case Plows are constructed on the most correct scientific principles, of the choicest materials, and are the best finished and best working plows in use. We unhesitatingly offer them in competition with plows of every other make, and guarantee them superior. The name of CASE is a guarantee of quality, as J. I. Case is one of the oldest manufacturers in the United States, and all goods bearing his name have for the last forty years maintained the highest standard of excellence.

All dealers and farmers will find it to their advantage to write us for terms and prices before purchasing elsewhere, as we can make it an object for them to deal with us, while giving a larger and more varied stock to select from than any other firm on the Pacific Coast.

WE CARRY THE MOST COMPLETE STOCK ON THE PACIFIC COAST OF MACHINERY AND VEHICLES of every description.

NEW ASTORIA: NEW ASTORIA.

This town has recently been laid out by M. J. and Albert Kinney, E. J. Ford and J. H. Smith, being a beautiful site selected years ago on the shore of the Columbia River Harbor, a short distance below Astoria, between Long Point and Fort Stevens, having the best deep water harbor, and sheltered from every dangerous wind that blows.

The surface of the location is neither marred by a deep gulch nor a deep gulch, but is level and of sufficient firmness for free and easy drainage.

The surroundings are splendid, a low hemlock covered ridge extending between it and the ocean affords shelter from raw winter winds. Extending to the south for twenty miles are the noted Clatsop Plains, and a drive of one mile to the west will come out on to that great ocean boulevard, the beautiful Clatsop Beach, of smooth, compact sand, on which a dozen carriages may drive abreast for twenty miles.

New Astoria is the place where the two railroads now building first touch deep water, and 2000 feet of its frontage, with ample grounds for terminal facilities, are reserved for the Albany & Astoria Railroad.

The Astoria & South Coast Railroad, now being rapidly built, will next year connect New Astoria with Portland, and for its terminal uses it has secured one hundred acres with frontage from the adjoining ground.

Besides being a site for a great commercial and manufacturing city, New Astoria has drives, has ocean air, and near by splendid surf bathing. It has been platted artistically with an eye to its future, has large lots with wide streets, broad avenues and grand boulevards.

It is a beautiful place and it will be a pleasure to live there.

Every lot in the town will be worth a fortune.

Robb & Parker, General Agents, ASTORIA, OREGON.

Time like the Present.

YOU CAN BUY—

Lots joining the city limits, in Berry's Astoria and Hanthorn's Astoria, cheaper to day than at any future time. This property is advancing. Terms easy.
